PROFILE SUMMARY

Computer Science graduate (CGPA 9.19) with strong foundations in Java, Python, SQL, and cloud platforms (AWS, Azure). Experienced in building end-to-end applications involving web development, and data cleaning. Skilled in Java ecosystem tools including JUnit, Log4j2, JDBC, and OOP principles. Currently pursuing advanced coursework in Machine Learning, Deep Learning, and NLP with end-to-end projects. Seeking a Java Developer or Software Engineer fresher role where I can contribute, grow, and build reliable software systems.

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript

Web & Database: HTML, CSS, Oracle SQL, MySQL

Cloud & DevOps: AWS (EC2, S3, basics), Azure, Git, DevOps Fundamentals

Java Ecosystem: JUnit (unit testing), Log4j2, OOP, Collections, Exception Handling, JDBC

Currently Learning: Machine Learning, Deep Learning, NLP

PROJECTS

Bus Reservation Data Cleaning

Java · JUnit · Log4j2 · JDBC · MySQL | Group Project · 2026

- Cleaned and validated bus reservation dataset using Java, handling missing values, duplicates, and format inconsistencies.
- Wrote comprehensive JUnit test cases to verify each data element and cleaning rule.
- Implemented Log4j2 logging throughout the pipeline for traceability of every transformation step.
- Inserted the cleaned and validated data into a relational database using JDBC.

Resume Portfolio Website [Live](#)

HTML · CSS · Responsive Design | Solo Project · 2025

- Built a personal portfolio website showcasing resume, projects, and skills.
- Designed a clean, responsive layout with smooth navigation and professional presentation.
- Deployed via GitHub Pages for public accessibility.

Sochfool — Personal Blog Website [GitHub](#)

HTML · CSS · Responsive Design | Solo Project · 2025

- Developed a fully responsive blog website with navigation bar, trip diaries, and about sections.
- Applied front-end layout design principles for clean structure and good user experience.

Fruit & Vegetable Image Recognition

Python · Deep Learning · CNN · REST API | Group Project · 2025

- Designed and trained a custom CNN model to classify fruits and vegetables from user-uploaded images.
- Built on a large labelled dataset to achieve high detection accuracy across multiple categories.
- Integrated the trained model into a web-based REST API for seamless user interaction.

INTERNSHIP

Systems Intern — National Aluminium Company Limited (NALCO) May – June 2024

- Observed server management, system monitoring, and network operations in a large-scale industrial IT environment.
- Gained understanding of how enterprise IT systems support plant operations and ensure reliability.
- Learned cross-department coordination practices in a large-scale public sector organization.

EDUCATION

B.Tech — CS & Communication · KIIT University **9.19 CGPA** 2026

Senior Secondary (XII) · DPS Nalco, Angul **92%** 2022

Secondary (X) · DPS Nalco, Angul **94.4%** 2020

CERTIFICATIONS & ACHIEVEMENTS

- Java Programming: Learn Java — Udemy
- Complete Web Development Bootcamp — Udemy
- Business Analytics for Decision Making — Coursera
- Scholarship awarded for academic excellence in Class XII board examinations.
- Consistently maintained 9.19 CGPA throughout B.Tech.
